

## Workshop Energy Systems Integration

**13 November 2019, 9.00-12.30**

**During European Utility Week in Paris**

**Meeting Room PEGASE within the ESPACE 2000 area**

Demand is rising for a global energy system that is sustainable, affordable and reliable. To meet this demand there is an increasing need for a new kind of energy professional: the next generation of transdisciplinary thinkers with the integrative mindset to join the dots, spot the opportunities and see the bigger picture in global energy. Join our experts in an engaging workshop and find business opportunities by learning how to use the ESI framework tool.

**Unique workshop during  
European Utility Week!**

Delivered by InnoEnergy - one of Europe's foremost authorities in sustainable energy education - this short, face-to-face workshop will be delivered during European Utility Week and has been designed to offer you deeper insights into energy systems integration. You will look at the totality of energy systems and learn to connect the dots with your line of work. You will gain the insights and tools to understand how Energy Systems Integration can be used in new ventures and business development.

#### During this workshop, we will:

- **09:00 – 09:30** Welcome and networking over coffee and croissants.
- **09:30 – 10:30** Introductions and presentation on the physical, institutional, and societal aspects of decarbonizing the energy system.
- **10:50 – 12:30** Interactive case study focused on energy systems integration in the transport and building sectors.

#### About the experts

- **Johan Driesen**  
Professor of Electrical Engineering  
KU Leuven University/EnergyVille
